

INSTITUTO FEDERAL DE EDUCAÇÃO, CIÊNCIA E TECNOLOGIA DE SÃO PAULO
BACHARELADO EM CIÊNCIA DA COMPUTAÇÃO
Prof. Mariana Santa Maria
IFIC3 Assignment– MEET THE PROFESSIONAL

Victor Ramos, Programming Student and Enthusiast of TV Series

What do you work on?

I don't work yet, but I am so excited to work in this area. The idea of creating news programs is very interesting. In this semester, I plan to do a scientific initiation at the university to have more experience and discover the areas of Computer Science.

How did you learn to program?

Since my childhood I have always liked computers, then, when I joined the high school, I did at the same time an IT course. During this course I learned the basics of programming and computer theory. And then, after I joined the university, I focused my time on learning programming, which really helped me.

What do you do when you're not programming?

I love to watch TV Series, like Breaking Bad, The Last of Us and The Boys. Besides, I really like to play video games and hang out with my friends. It's so good to just forget about the responsibilities and going out for fun from time to time usually helps me with my homeworks. After all, emptying my mind always helps me to have ideas to solve problems at university.

What's your one piece of advice for new programmers?

If someone asks me for advice to start learning programming, I would say to really practice, this is what is really important and makes the difference. With practice, you automatically absorb the ideas and everything starts to be more natural and easy.
