

Subject: Victor Ramos - Software Developer (Front-End/Web) Position

Dear Sir,

I'm writing this email to express my interest in the Software Developer Job Opportunity listed on indeed.com. After having seen your job opening on the website, I had a really big desire to participate in the job. I would like to apply for the position because I believe I really could be useful and help with the objectives of the company helping on Web Development. I really like this type of programming.

The role is very appealing to me because I have always liked this area and have a big facility to learn more and apply knowledge on this type of project. My key strengths that would support my success in this position include my ability with Web Software Developments and my nice ability with teamwork and cooperation on a same project.

I have a comprehensive understanding that I don't have experience and will have to learn a lot along with my time on the position, but I think that's a good thing because it will serve as motivation to me to search for more knowledge and improve my abilities.

To my information, you can access my e-portfolio attached below. If you need any further information, do not hesitate to contact me, I would be able to attend an interview any morning.

Yours faithfully,

Victor Ramos
